# FLOOR MOUNT (WALK-IN) FUME HOOD — DUAL VERTICAL RISING SASHES

Standard Features	04
Options Overview	06
EXHAUST COLLARS	
Locations / Diameters	08
CATALOG NUMBER EXPLANATION	10
INTERIOR LINER MATERIALS	11
FLOOR MOUNT FUME HOODS	
Constant Air Volume (CAV), Full By-Pass Dual Vertical Rising Sash	12
Variable Air Volume (VAV), Restricted By-Pass Dual Vertical Rising Sash	16
BUILD YOUR FUME HOOD	20

## STANDARD FEATURES DUAL VERTICAL RISING SASHES

#### **HOOD TYPES**

Hoods are available as:

- Constant Air Volume (CAV), Full By-Pass
- Variable Air Volume (VAV), Restricted By-Pass
- 915mm (36"), 1220mm (48"), 1525mm (60"), 1830mm(72"), 2440mm (96") wide

#### FINISH

- Finish is an electrostatic powder coating applied to all surfaces. Parts are baked in a controlled high temperature gas oven with infrared preheat.
- Resultant finish has a hard and smooth laboratory grade chemical resisting finish.

### 1 SUPERSTRUCTURE

- Fully framed, self supporting
- Exterior panels fabricated from sheet steel with baked electrostatic powder coating
- Exterior front and upper side panels have hidden fasteners and are removable without tools
- Exhaust collars are round in configuration and do not require rectangular-to-round transitions

#### 2 INTERIOR ACCESS PANELS

Fully framed, self supporting

- Flush mount
- Fully framed and air tight
- No gaskets required

#### 3 SASHES

- 6mm (7/32") laminated safety glass
- Full view type 1880mm (74") high
- Type 316 stainless steel full length sash pulls
- Maximum sash opening height 1625mm (64")
- Dual vertical rising

## 4 FRONT FACE OPENING

 Aerodynamically angled top, and side openings reduce turbulence and eliminate reverse flows

### 5 INTERIOR LINER MATERIALS

- Polyresin
- Stainless Steel
- PVC
- Polypropylene
- Custom materials available to fit specific requirements

## 6 BAFFLES

- Five section baffle design with side, upper, center and lower exhaust slots
- Baffle plates are fixed and factory set for optimum containment per ASHRAE 110-2016 Tracer Gas Testing

### 7 LEVELING FEET

• Built in for ease of installation

## 8 ELECTRICAL

Standard electrical fixtures comprise:

- Two 120V/20A duplex receptacles
- Vapour sealed LED lighting with light switch
- All fume hoods are factory pre-wired to a roof mounted junction box using only CSA/UL certified electrical components

#### **APPROVALS**

H.H.Hawkins Fume Hoods have been tested and certified for use in North America by Intertek Canada and designated with the cETLus mark.

Certified to the following standards:

CAN/CSA-C22.2 No. 61010-1-12 + UI;

U2; AI UL61010-1:2012 Ed. 3+R21

Nov2018 and UL 1805:2002

#### TRACER GAS TESTING

Fume Hoods are tested to the ASHRAE 110-2016 Method of Testing Performance of Laboratory Fume Hoods and exceed ANSI/AIHA Z9.5, CSA Z316.5-15 and MD15128-2013 recommendations.

04 - 05/01/23

## | STANDARD FEATURES DUAL VERTICAL RISING SASHES

05/01/23 05

## OPTIONS OVERVIEW DUAL VERTICAL RISING SASHES

## 1 CEILING CLOSURE PANEL

- Designed to enclose the top of the hood to the ceiling
- Encloses both sides and front
- Front panel is removable for access to the top of the fume hood
- Fabricated from the same material as the fume hood exterior
- Colour matched to the hood exterior colour

# 2 MECHANICAL SERVICES FIXTURES

- Remote controlled from the front face of the fume hood
- Front loaded valves
- Factory pre-piped, conforming to applicable codes
- Colour coded handles and interior fittings

## 3 PRE-PIPING

- Factory installed terminating above or below the hood superstructure
- Burning gas: corrugated stainless steel flexible tubing with connector, conforming to applicable codes
- Water and technical gases: SPX hose with stainless steel braiding and connector termination

### 4 LOW AIRFLOW ALARM/MONITORS

- Factory Installed
- Built in airflow sensor continuously monitors face velocity
- LED display indicates Safe and Alarm conditions
- Pushbutton calibration and configuration, password protection

## 5 FLOOR PANS

- To contain spills
- Raised edges 12mm (1/2")
- Liquid tight
- Type 304 or Type 316 18 gauge stainless steel
- Galvanized, 18 gauge
- Polyethylene

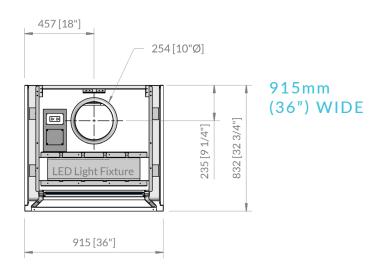

## 6 FLOOR SILLS

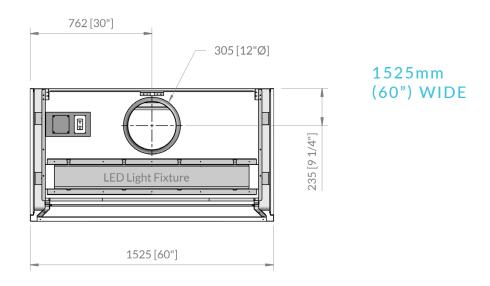

• Type 304 or Type 316 angled sill with floor pan for rolling equipment in and out of hood

## | CATALOG NUMBER EXPLANATION | INTERIOR LINER MATERIAL DUAL VERTICAL RISING SASHES

10 \_\_\_\_\_\_\_05/01/23

#### | CATALOG NUMBER EXPLANATION | INTERIOR LINER MATERIAL

#### INTERIOR LINER MATERIALS

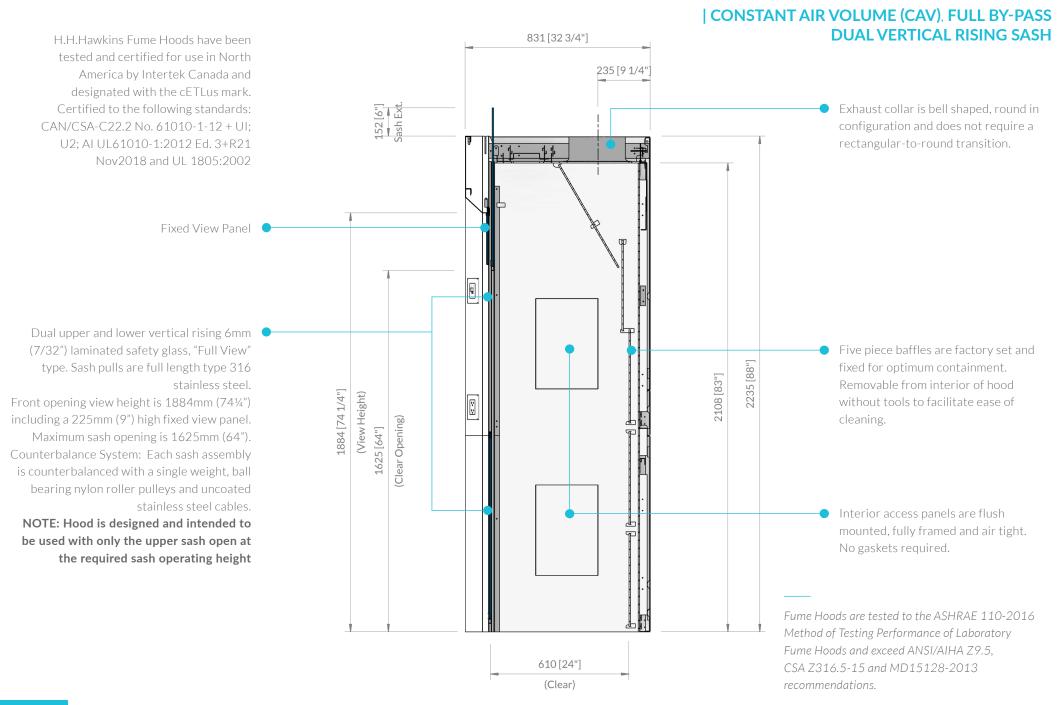

- PR Polyresin: 1/4" thick, solid fibreglass reinforced pressed thermoset resin board. Material offers superior chemical, solvent and corrosion resistance, negligible moisture absorption and a flame spread of less than 20 (UL 7231 ASTM E84-80). Flexural strength is a minimum of 19,000 PSI (D790). Material is white in colour throughout its thickness offering superior light levels. Maximum service temperature is 130 C (266 F). Exhaust collar is type 316 stainless steel.
- Stainless Steel: Type 316 (ST6) or Type 304 (ST4) stainless steel, 16 gauge, number 4 finish. The sides and back of interior liner are formed in one piece with the top of the liner being stitch welded to the back and sides. Upper and lower sections are mechanically fastened together and sealed. Offers excellent heat and solvent resistance and good chemical resistance to most acids. Stainless steel is not recommended for use with chemicals such as Hydrochloric Acid, Hydrofluoric Acid, and Sulphuric Acid to 80% solution. Exhaust collar is stainless steel.
- PP Polypropylene: 1/4" thick, solid, flame retardant, self extinguishing and stressed relieved polypropylene sheet. Liner is rigid and self supporting. Interior is metal-free. Material is white in colour throughout its thickness. Offers excellent corrosion resistance to a wide range of acids and solvents. Material has good impact resistance and structural integrity and has little or no water absorption. Maximum operating temperature is 82C (180F). Exhaust collar is PVC.
- PVC: 1/4" thick, solid, flame retardant poly vinyl chloride sheet. Liner is rigid and self supporting. Interior is metal-free. Material is white in colour throughout its thickness. Offers excellent corrosion resistance to a wide range of acids but is not recommended for use with solvents. It has little or no water absorption and possesses natural flame resistant qualities. Flame resistance is rated at UL94V-O. Maximum service temperature is 60C (140F). Exhaust collar is PVC.

Technical specifications and chemical resistance chart are available upon request.
